IRREGULARITIES – CHIEF (Coursework only)

If you suspect an assessment irregularity (e.g. plagiarism, collusion or multiple submission) please list the student ID and potential issue, otherwise leave blank.

STUDENT ID(s)	SUSPECTED ISSUE
N/A	N/A

NUMERICAL ANSWERS – CHIEF (Exam only, EXCEPT RESITS, published to students)

Question	Numerical Answer
Q1.2(i)	$N_A = 3.3 \times 10^{15} cm^{-3}$.
Q1.2(ii)	$N_D(0) = 7.2 \times 10^{18} cm^{-3}$.
Q1.4	$\mathcal{E} = 2.9 kV \cdot cm^{-1}$.
Q2.1(ii)	$N_D = 5 \times 10^{14} cm^{-3}$.
Q2.2	$N_A = 4.6 \times 10^{18} cm^{-3}$.
Q2.3	$0.045V \leq V_R \leq 3.8V$.
Q3.2(ii)	1.18 μm
Q4.2(ii)	Dependent of device geometry, e.g. 10 μm×10 μm per device gives ~77018 die.

ASSESSMENT CHECKLIST 2

MARKS FINALISATION – CHIEF AND PROOF

We confirm that:

- The marking and checking of the above assessment have been completed in accordance with the Manual of Assessment Procedures.
- The marks conform to the advertised marks matrix, Senate Marking Scale and appropriate UG/MScT Level descriptors.
- Marks have been entered onto the spreadsheet by the Chief, moderated by the Proof and checked by the Checker.

Chief: ____ Prof Dagou Zeze _____ **Date:** _ 08 / 06 /2020 _

Proof: ____ Dr Iddo Amit _____ **Date:** _ 08 / 06 /2020 _

Assessment Average:

Are marks within the expected bands for this level? Yes ◙ No □
(NOT required for resit examinations and examinations with less than five submissions)

Chief's Report (Exams and Coursework, published to students and external examiners – NOT required for resit examinations)

- Brief discussion (if necessary) as to why marks are outside expected range.
- Cohort feedback: What went well? What were the common errors or misunderstandings?

The paper was initially set up as a closed book and under controlled conditions examination. With the change in circumstances, open-ended sections were added to each question, to ensure that a fair assessment of the students' knowledge can be made, and that the learning outcome is entirely covered. The overall average of 71.30% is a clear evidence of an excellent understanding of the material covered in the module. The numerical calculations were relatively straightforward for students who understood the material well. However, some of the graphical illustrations and explanation of some underlying physics could be better, more precise and concise. Students who read the instructions carefully and provided specific answers scored highly. Overall, students found open-end questions a bit more challenging.
