MARKS FINALISATION – CHIEF AND PROOF

We confirm that:

- The marking and checking of the above assessment have been completed in accordance with the Manual of Assessment Procedures.
- The marks conform to the advertised marks matrix, Senate Marking Scale and appropriate UG/MScT Level descriptors.
- Marks have been entered onto the spreadsheet by the Chief, moderated by the Proof and checked by the Checker.

Assessment Average:

Are marks within the expected bands for this level? Yes x No □
(NOT required for resit examinations and examinations with less than five submissions)

Chief's Report (Exams and Coursework, published to students and external examiners – NOT required for resit examinations)

- Brief discussion (if necessary) as to why marks are outside expected range.
- Cohort feedback: What went well? What were the common errors or misunderstandings?

The average mark is within the band. Most of the students could answer Q1, Q2 and Q3 well but did not do that well with Q3. In Q3 several students essentially answered using the different circuit which was on their handouts (consisting of a differential amplifier and a common-source amplifier) rather than the one in the question (consisting of a differential amplifier and a current mirror).
