IRREGULARITIES – CHIEF (Coursework only)

If you suspect an assessment irregularity (e.g. plagiarism, collusion or multiple submission) please list the student ID and potential issue, otherwise leave blank.

STUDENT ID(s)	SUSPECTED ISSUE
None	None

NUMERICAL ANSWERS – CHIEF (Exam only, EXCEPT RESITS, published to students)

Question	Numerical Answer
Q1.2(i)	1.5×10^{14} cm^{-3}.
Q1.2(ii)	2.61 μm
Q2.3(i)	172 μm.
Q2.3(iii)	2459 A cm^{-2}; 3041 A cm^{-2}.
Q3. 2(iii)	86 nm
Q3. 4	103,550 hours and >11.5 years

ASSESSMENT CHECKLIST 2

MARKS FINALISATION – CHIEF AND PROOF

We confirm that:

- The marking and checking of the above assessment have been completed in accordance with the Manual of Assessment Procedures.
- The marks conform to the advertised marks matrix, Senate Marking Scale and appropriate UG/MScT Level descriptors.
- Marks have been entered onto the spreadsheet by the Chief, moderated by the Proof and checked by the Checker.

Chief: ____ Prof Dagou Zeze _____ **Date:** _ 04 / 06 /2020 _

Proof: ____ Dr Mujeeb Chaudhry_____ **Date:** _ 04 / 06 /2020 _

Assessment Average:

Are marks within the expected bands for this level? Yes □ No ■
(NOT required for resit examinations and examinations with less than five submissions)

Chief's Report (Exams and Coursework, published to students and external examiners – NOT required for resit examinations)

- Brief discussion (if necessary) as to why marks are outside expected range.
- Cohort feedback: What went well? What were the common errors or misunderstandings?

The paper was initially set up as a closed book and under controlled conditions examination, which would have yielded a mark within the band. The learning outcome is fully covered. The overall average of 73.62% is too close to the upper band boundary. Furthermore, the number of students is relatively small (45). Therefore, we cannot find any academic reason to scale the marks down artificially.

There was clear evidence of a very good understanding of the material covered in the module, evidenced by the relatively high overall average. The numerical calculations were relatively straightforward. However, some of the graphical illustrations and explanation of some physics could be better, precise and concise.

Students reported that a reference to equation (2) in Question 2, despite the fact that there was no equation provide in Question 2. In fact, the expression "*is given by equation (2)*" was redundant and did not affect the outcome in any way.
